

25,000 WATT WIND TURBINE PROPOSAL

530-894-5588
www.aerowindenergy.com

Mounting: **GALVY 59' Monopole**
 Grid-Tie? **On Grid**

Total System Watts: **25,000**
 Configuration: **Mono Pole Tower**

Estimate generated kWh per month: 2200 to 4000
 Estimate generated kWh per year: 26400 to 48000
 Month peak estimate kWh: 4400

Wind Turbine	Aero Wind Energy 25 kW Wind Turbine
Tower	Free Standing Monopole 59' Tower
Mono Tower 59 ft upgrade	
Blades	Deluxe blade set/flange/hub
Controller	On-Grid Turbine Controller
Inverter(s)	4 Aurora PVI-6000out-US-W (240V)
Misc.	96.5% efficiency
Export/import Taxes	5 year Warranty
	Included

Note: Your available rebate is calculated by multiplying the first 7500 watts, by \$2.50 and the remainder by \$1.50, then add the two products together for your estimated rebate amount. As CEC calculates the final rebate, Power Shacks, inc cannot be responsible for any final incentive amount awarded.

Acceptance to be by separate Sales Agreement

System Equipment Cost to Include:

Shipping/Freight to Oakland, CA., Insurance; □
 Engineering for tower and foundation by licensed Engineer. Any additional engineering is buyer's responsibility. Preparation for PGE E-Net Program, Site Drafting, and Rebate Processing. **\$ 61,971.58**
